Dear Principals, Teachers and Parents

Re: Kid-Netic Energy Girls Club and Kid-Netic Energy Saturdays Program

WISE is a science and engineering outreach program offered by The University of Manitoba as means of enriching the science education of Manitoba students. WISE delivers fun and exciting science and engineering workshops to Manitoba classrooms, science and engineering summer camps as well as special outreach projects. This year two of our special projects are: *Kid-Netic Energy Girls and Kid-Netic Energy Saturdays!*

Kid-Netic Energy Girls is new for 2009-2010! This is an ALL girls science and engineering club for girls in grades 4 – 7. Club meetings will be held on Saturdays from 12:30 – 3:30 in the Faculty of Engineering at the University of Manitoba. The club will allow members (20 maximum) to explore various fields of science and engineering, engage in mentor events with scientists and engineers, engage in self-directed projects and participate in field trips to several science and engineering facilities in Winnipeg. Programming is provided by University of Manitoba undergraduate female students studying science and engineering. The cost is \$195 for 13 meetings. WISE is proud to offer 4 bursaries for families in need.

Kid-Netic Energy Saturdays is our popular science and engineering mini-camp offered on Saturdays for grade 4 – 7 students. The group (maximum 20 students) will meet for 4 or 5 Saturdays (session dependent), exploring at different science or engineering theme each week. “Campers” will have projects, experiments, games and activities to stimulate learning and exploration. Programming is provided by University of Manitoba undergraduate female students studying science and engineering. Kid-Netic Energy Saturdays is \$60 – 75 (session dependent), again bursaries are available for families in need.

Registration is now open for these exciting and educational opportunities! Please distribute this information to teachers, colleagues and students who may be interested. If additional registration brochures are needed please feel free to call our office at 474-9340 – or photocopy the enclosed for immediate distribution! Thank you for your assistance with these projects. Also included is the WISE workshop catalogue for 2009-2010. We are now accepting bookings for K – 12 workshops.

Sincerely;

Colleen Flather
Director
